TiSeat S

Ingenuity in Business Class

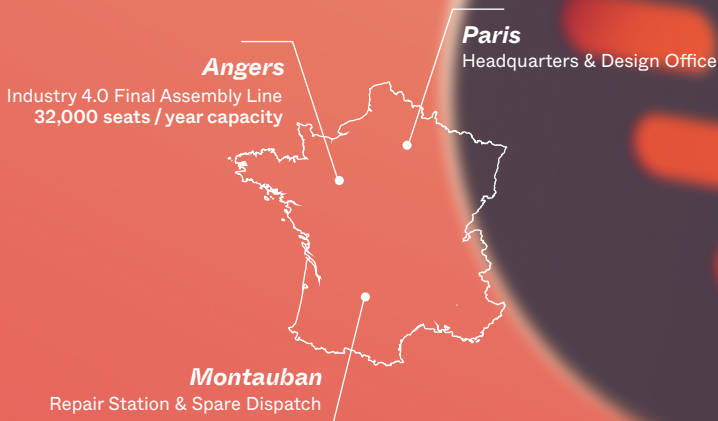

Ingenuity that works.

Explicat is setting a new standard in seating solutions across air and rail, combining ultra-lightweight engineering with industrial-grade performance. As the manufacturer of the world's lightest seating solutions, we design and manufacture seats for both aircraft and rail operators worldwide. Our approach brings together engineering excellence, proven reliability, and scalable production to deliver measurable value, from reduced operational costs to enhanced passenger experience.

«When weight goes down, value goes up.»
